# 1. INTRODUCTION

Are you crazy about music? Music can change the mood and talk to you. Listening to music is a favorite hobby and entertainment for most people.

Here is an addon that does the job for you. **'BMusic Player'** is an addon that takes all the music to one place inside blender. Plays almost any formats like mp3, wav, FLAC, M4A, aac etc.

## ***BMusic Player v1.0.1 (Initial Release)***

### **Key Features:**

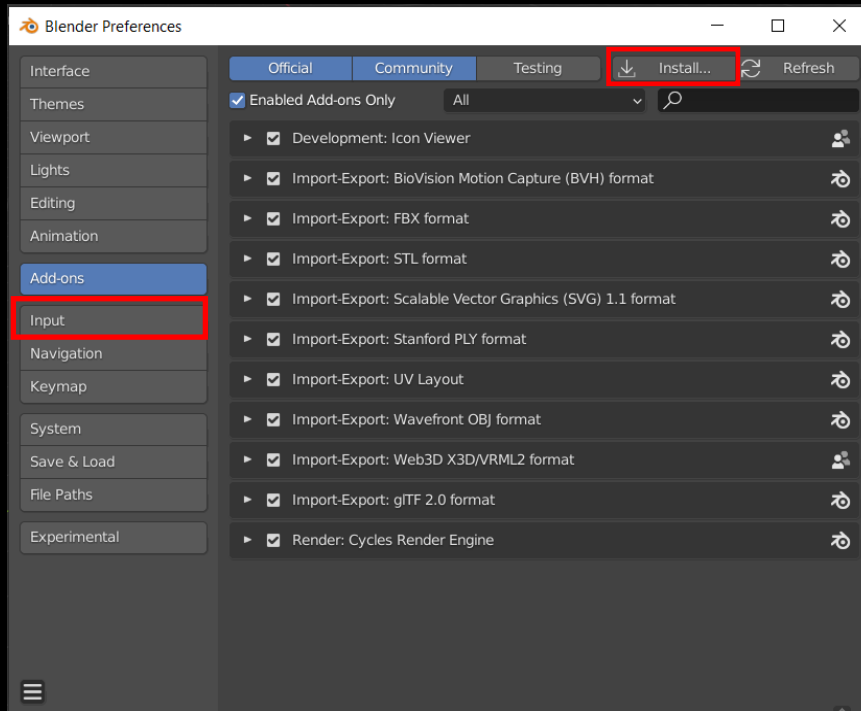

- ✓ Custom icon set.
- ✓ Popup music player.
- ✓ Custom shortcut key.
- ✓ Supports almost any formats like mp3, mp4, wav, M4A, aac, FLAC etc.
- ✓ Dedicated documentation

## ***BMusic Player v1.0.2***

### **Planned Features:**

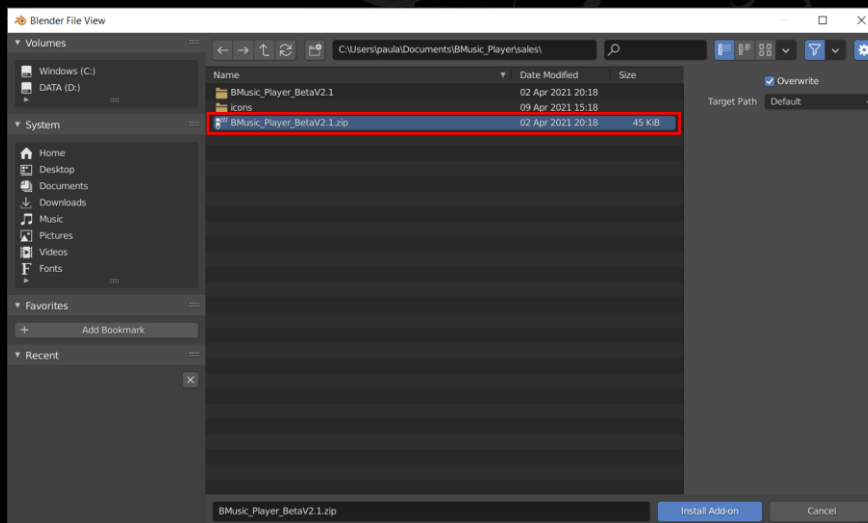

- ✓ Sleep timer.
- ✓ Personal playlist option.
- ✓ Change playback speed.
- ✓ Multiple key mapping.
- ✓ Default music folder.

## 2. INSTALLATION

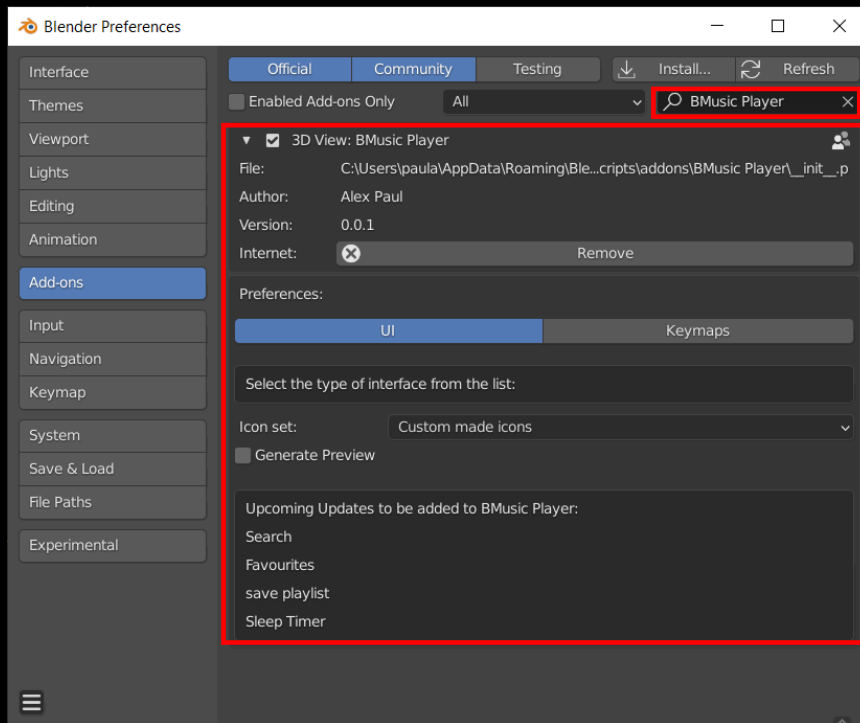

Headover to the website you have purchased BMusic Player and download the zip file shipped with it (no need to unzip the file).

Open blender and headover to addons tab in preferences.

Install the addon using the install button and selecting the zip file.

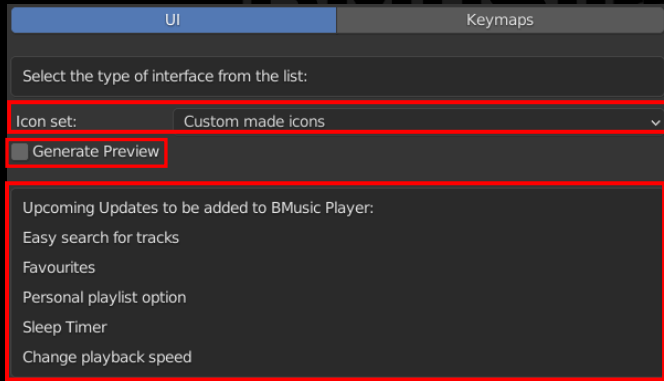

## 3. PREFERENCE

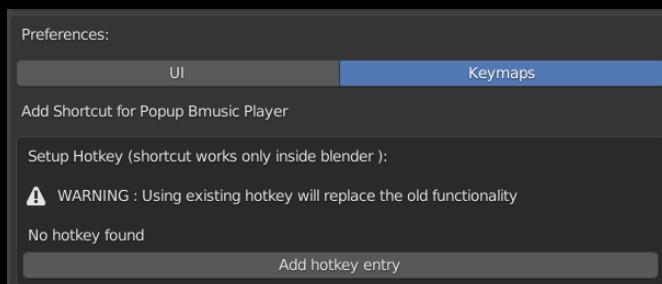

This is how the preferences look like after enabling the addon. You can search for “BMusic Player” to get the preference.

From here you can select the icon type and see what’s coming on next update. And set the shortcut key for popup music player.

### 3.1 The UI and keymap tabs

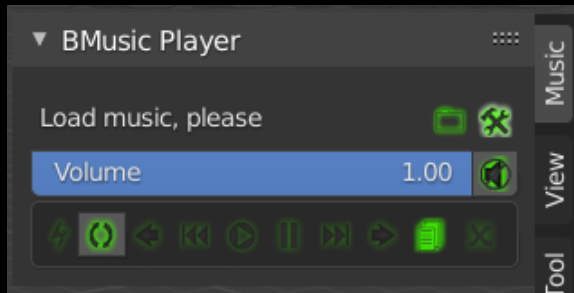

You can select the type of icon you prefer and see a preview of the icon set using the generate preview option (preview will be of low quality because of the limitations from blender interface). Maybe more icon set, and interfaces will be added to the list.

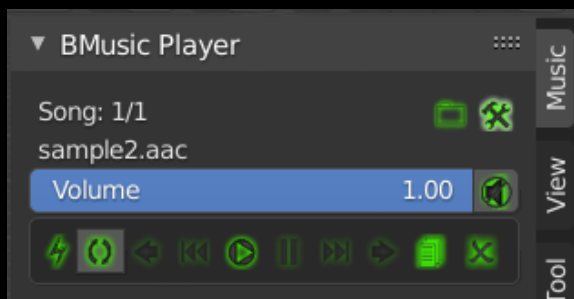

Using the Keymaps tab you can assign your custom key for the popup BMusic Player

## 3.2 Preview of custom preset icons

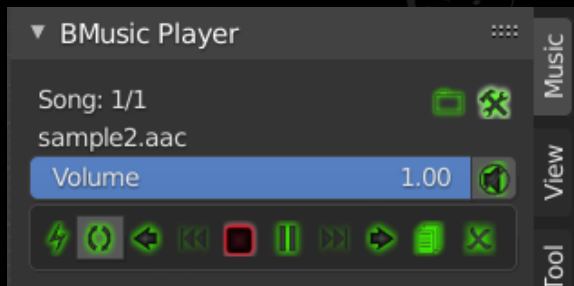

### a) Initial interface

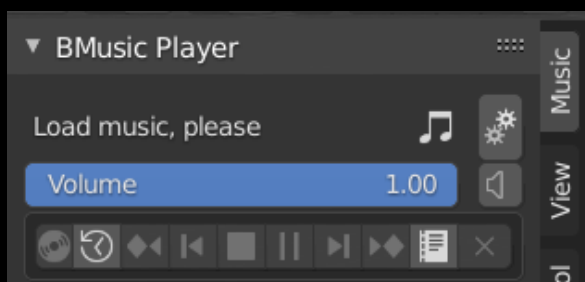

### b) After adding songs

### c) On playing

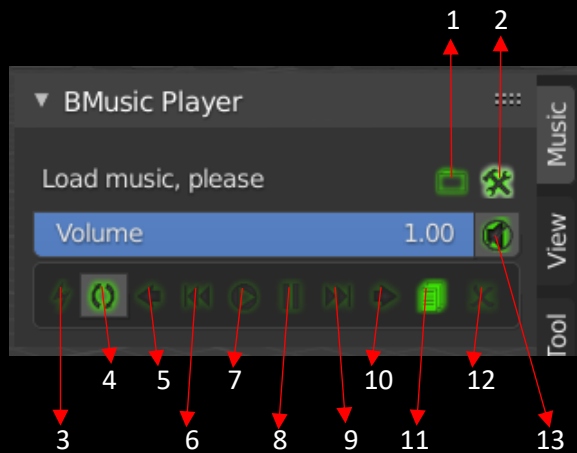

## 3.3 Preview of the Blender icon set

Blender icon set is the icon taken from the icons shipped with blender. So, there may not be an exact icon matching the interface.

## 4. USER INTERFACE

1. Open: Add the songs from the folder
2. Preference: Open preference from here.
3. Shuffle: Shuffle the songs/sounds.
4. Repeat: Enable to play songs repeatedly after the last one.
5. 10 sec back: To play the song 10 second backward.
6. Previous: To play the previous song.
7. Play/stop: To play/stop the song.
8. Pause/ resume: To play/resume the song.
9. Next: To play the next song.
10. 10 seconds forward: To play the song 10 second forward.
11. Playlist: Enable to see added songs in the list.
12. Clear: To remove all the songs in the list.
13. Mute: To mute the volume of the playing music.

## 5.HOW TO USE

open the music using the [folder icon](#). Use the [list](#) feature to see all the list of added music. Start the music directly using the [play](#) button or selecting the music from the [list](#).

You can [pause or resume](#) the using the button available. There is an option to [stop](#) the music. To navigate through the music there are 4 options available.

Using [Next](#) and [previous](#) you can play next and previous music respectively. And the option [10 sec backward](#) and [10 second forward](#) helps to move 10 secs according the action you choose.

[Shuffle](#) the music for more ease. And [repeat mode](#) helps to play music repeatedly after the last music is played. You can [mute](#) the music if necessary, from inside blender itself. And you can [clear](#) the whole list any time you need.

You can change the [settings](#) from selecting the shortcut to the [preferences](#) from the addon interface.

## 6. CONCLUSION

We take a lot of time to deliver this addon with the best possible features. So if you like to keep this addon alike please support us.

### 6.1 Other addons available from my team:

Visit our [Gumroad profile](#) to buy
