# BMusic Player

## DOCUMENTATION

# TABLE OF CONTENTS

# 1.INTRODUCTION

Are you crazy about music? Music can change the mood and talk to you. Listening to music is a favorite hobby and entertainment for most people.

Here is an addon that does the job for you. **'BMusic Player'** is an addon that takes all the music to one place inside blender. Plays almost any formats like mp3, wav, FLAC, M4A, aac etc.
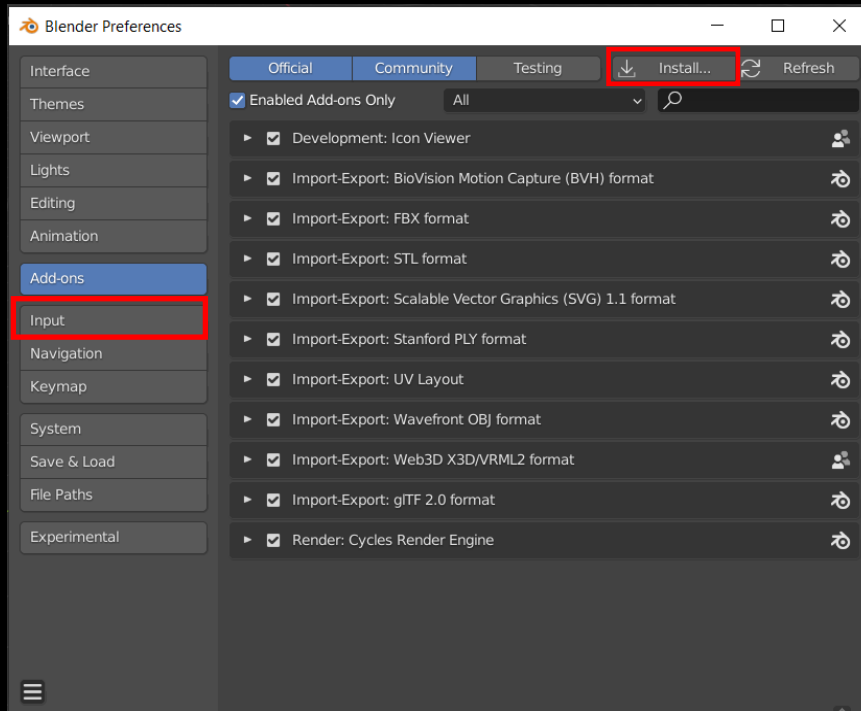

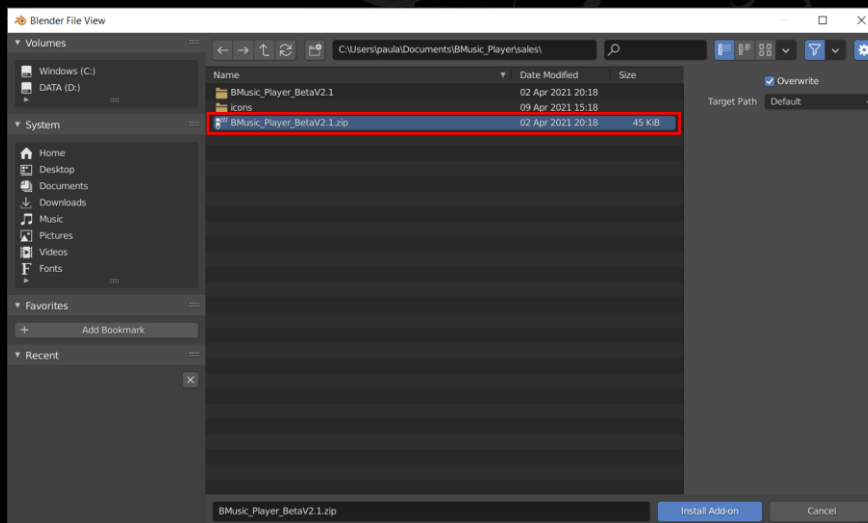

## Key Features:

- Custom icon set.
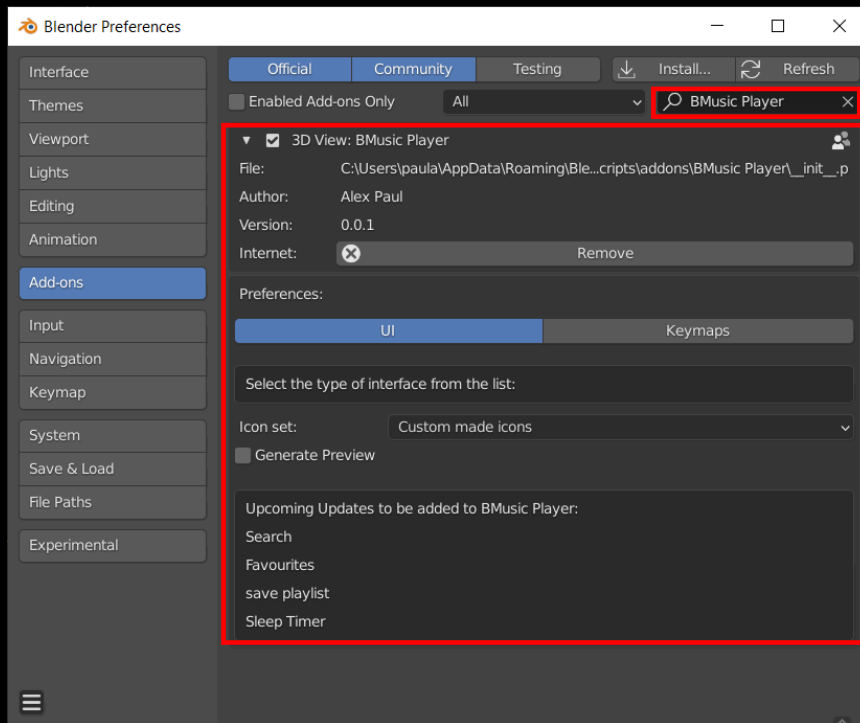

# 2. INSTALLATION

Headover to the website you have purchased BMusic Player and download the zip file shipped with it (no need to unzip the file).

Open blender and headover to addons tab in preferences.

Install the addon using the install button and selecting the zip file.

# 3. PREFERENCE

This is how the preferences look like after enabling the addon. You can search for "BMusic Player" to get the preference.

From here you can select the icon type and see what's coming on next update. And set the shortcut key for popup music player.
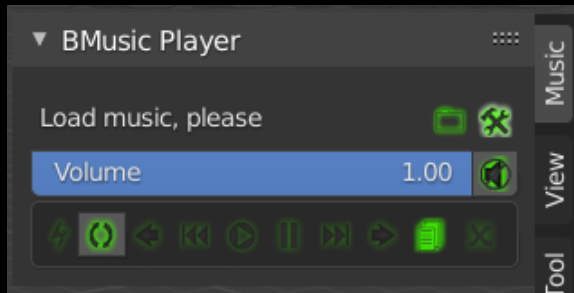

## 3.1 The UI and keymap tabs

You can select the type of icon you prefer and see a preview of the icon set using the generate preview option (preview will be of low quality because of the limitations from blender interface). Maybe more icon set, and interfaces will be added to the list.

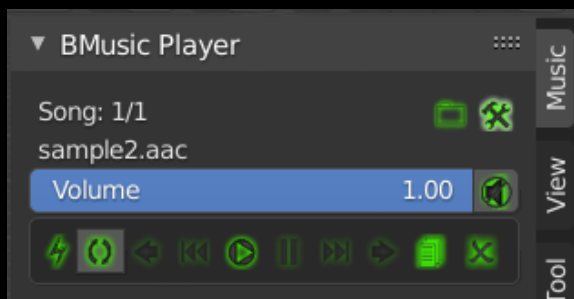

Using the Keymaps tab you can assign your custom key for the popup BMusic Player
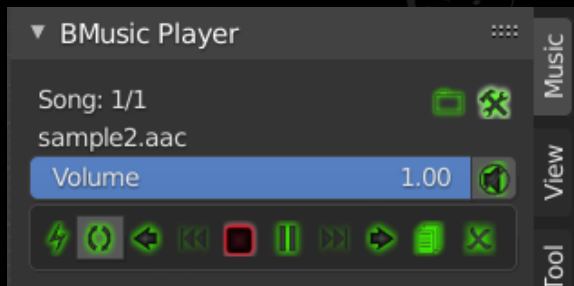

## 3.2 Preview of custom preset icons

### a) Initial interface

### b) After adding songs

### c) On playing

## 3.3 Preview of the Blender icon set

Blender icon set is the icon taken from the icons shipped with blender.so there may noy be an exact icon matching the interface.
